

Our Capabilities

sacchiconcrete.com.au

The Concrete & Civil Construction Experts

Established in the early 2000s, Frank Sacchi launched 'Sacchi Concrete Constructions' after an extensive construction career across Darwin, Mount Isa, Nerang, Mackay and the Bowen Basin Coalfields. With a mission to service the community with a personalised and quality-assured local alternative, he built up the business focused strongly on his connections to the land and community surrounding it.

“Our local approach means we offer a more personalised service...”

With his eye for detail and desire for sustainable change, he developed an extensive business network and referral system connecting Sacchi services with a vast array of local contractors, mining corporations, Government Departments and Community Associations.

A proud locally owned and operated business, Sacchi has successfully completed projects ranging from small private constructs through to extensive commercial projects within timeline and budget requirements.

Services

CONCRETE CONSTRUCTION

With a highly-experienced and coal mine certified workforce, Sacchi Concrete Construction has successfully completed an impressive portfolio of concrete projects, ranging from small private constructs through to \$10M projects.

From concrete core drilling services to welding facilities at the Moranbah location, Sacchi completes projects according to a variety of specifications and requirements, supported by relevant workers insurance and public liability to the value of \$20M.

CIVIL CONSTRUCTION & EARTHMOVING

With the capacity to undertake large scale projects, Sacchi Concrete Constructions provides civil construction, earthmoving and construction services to a range of infrastructure projects.

From bulk earthworks for industrial and commercial projects, through to installation and coordination of major services including drainage and sewerage, Sacchi has the resources and machinery for both the private and public sector.

ENGINEERING

Sacchi Concrete Construction can provide engineering services through their own in house engineering team capable of providing design solutions for the civil and mechanical industries. All services are fully RPEQ Certified.

THE
SACCHI
DIFFERENCE

SAFETY

The safety of staff and contractors is vital to the success of projects.

FLEXIBILITY

Strong communication and mutual respect ensures positive outcomes for all.

CLIENT FOCUS

Reliability and an open approach to projects, each and every time.
